

A Fortune 100 Bottler

doubled pallet throughput with
dedicated automation maintenance

Challenge:

Facility has an elevator and bridge conveyor system that connects production to distribution. The system failed 2x each day.

PRODUCTION

BRIDGE CONVEYOR

DISTRIBUTION

The bottler had self-performed for years but decided to bring on Concentric's specialized, dedicated maintenance team including maintenance operating system and consignment parts.

Within months, the throughput improved.
For the last 5 years, pallet throughput has been consistently double.

2X
pallet
throughput
540/hr

99%
uptime
from 1 hr of
downtime/shift to
1 hr/15 days

How much is a pallet of throughput worth to your operation?
