

EARN CASH INCENTIVES USING EV EQUIPMENT!

Starting in January 2023, turn your electric equipment fleet into a quarterly revenue stream through earned credits generated by the Washington State's Department of Ecology Clean Fuel Standard (CFS) program. This new revenue can help offset charging and maintenance costs, equipment purchases, or fund new sustainability initiatives.

HOW THE PROGRAM WORKS

Customers can sign up now with Concentric for the Clean Fuels Program that starts in January 2023.

Once registered, Concentric collects the power data quarterly from the customer's electric assets and organizes, validates, normalizes and synthesizes the data.

Concentric submits the power data to Washington State's Department of Ecology Clean Fuel Standard (CFS) program and walks the submissions thru the government processes, including any future audits.

The government program reviews the company's reporting and generates earned credits based on power consumption.

Concentric trades the credits on the market on the customer's behalf to maximize payments and earning potential.

Every quarter, participating customers receive their incentive payments from Concentric.

FAQ's

Q: When can I enroll?

A: Now! Contact your Concentric sales rep. to sign up for the program today.

Q: Is there a cost to enroll?

A: There is no cost to your company to enroll.

Q: Do I have to purchase new equipment?

A: No. Your existing fleet of rented, leased, or owned electric equipment to qualify.

Q: Will I get retroactive pay back to when I rented, leased, or purchased the electric equipment?
