Cordex HP™ 1.2kW

1RU Integrated Shelf System with GMT Distribution

- Single shelf modular rectifier solution provides up to 75A capacity @ -48Vdc for various small power applications
- High efficiency design for reduced operating expenses
- High temperature rated, fan-cooled design for harsh outdoor installations
- Wide range AC input and IEC line cords for multiple AC services
- Front accessible fuse distribution for space restricted enclosures

Cordex™ High-Performance (HP) rectifiers make a proven, reliable platform even better, with significant advancements in efficiency and performance.

Featuring a compact, fan-cooled design, HP rectifiers open the possibility to wider ranges of applications and immediate OP-EX/CAP-EX savings, reducing total cost of ownership and impact on the environment.

Designed specifically for restricted space installations, this 48Vdc power and distribution system incorporates the reliable 48V, 1.2kW Cordex rectifier modules and front accessible fuse distribution connections. The system is a perfect solution for small 48Vdc power applications such as customer premise, xDSL, FTTx, distributed node B and microwave. High efficiency, high temperature operation, and a small 1RU footprint make the system ideal for harsh outside plant installations.

The 19/23" universal rack mount power system accommodates up to three Cordex HP 48V-1.2kW rectifiers and a modular Cordex CXCM 1 HP controller, with GMT Fuse distribution, in a compact 1RU package.
